

17 February 1972

MEMORANDUM FOR:

O/DDI

SUBJECT:

Intra-Agency Security Committee
Meeting of 17 February

1. Attached for your files or whatever you wish to do with them are four documents from the Intra-Agency Security Committee meeting on the afternoon of 17 February. The first is a redraft of the Agency notice on security which is, I gather, for final coordination and is okay with me although it does not take into account all of the changes that CRS suggested.

2. The second is a memorandum from Houston on the status of [] about which nothing can or need be done at this instant.

3. The third is an outdated redraft of [] which should probably be destroyed as soon as another draft is available.

4. The last is the beginning of a memorandum for Colby, also outdated. It is intended to prepare the DCI for a Congressional interrogation on CIA declassification policy and practice. It is outdated because that is not what it deals with. Read them with joy.
